## Wall scraper, or wallboard taping knife

The ½ inch to 6-inch flexible wall scraper, or wallboard taping knife, removes wallpaper and softened paint from flat surfaces. It is also used to level off applications of plaster compound.

## Brushes

The brush requires more time and skill, but it is still the most versatile painting tool, and the best for certain types of work. It is, for example, the best choice for fine enamel and varnish work. Size available in ½ inch to 6 inch

## Rollers

The pros and cons of hand painting tools are simple. The roller is four to five times as fast as the brush, and, unlike the brush, it produces professional looking results even in the hands of an unskilled user. But it is not as versatile as the brush.

Sizes: 4 inch – 7 inch – 9 inch

Size: 14cm x 28cm
