

# MAGTRON

hole cutting technology

## New product!

Featuring the brand new UNI 4 motor, the new **MBE100PLUS** is the most powerful machine in the Magtron range.

Capable of cutting holes up to 130mm diameter. The 4 geared speeds will provide optimum cutting surface speeds for most types of material and cutter sizes, while the automatic oilfeed ensures effective lubrication during drilling. The new solid state control panel provides positive and reliable switching.

### MBE100PLUS specifications

Cutter capacity	- 12 - 130mm
Twist drill capacity	- 32mm (No 3 MT)
Chuck capacity	- 3 /4"
Stroke	- 235mm
Power consumption	- 1750w
Clamping force	- 18,150N (1860kg)
Rated speeds	- 110/175/245/385 rpm
L x H x W	- 360 x 540 x 150mm (260mm inc. handle)
Magnet footprint	- 220 x 110mm
Weight	- 26 kg
Voltage	- 110 or 220-240v

**INCLUDES:** Warranty, Carrying case, No3 MT arbor, Allen keys, Safety strap & guard, Cutting Oil.

For engineering excellence!

The ideal solution for fast, cost effective hole cutting in the workshop or on site

### FEATURES:-

- \* 3MT arbor
- \* 4 geared speeds, clutched gears
- \* Fitted oilfeed system
