

Pavo
380LED

Technical Data

Name & No.	Watt	kg	Description
Pavo 380LED	80W	6,00	<ul style="list-style-type: none"> • IP 56 • casing and bracket made of seawater resistant aluminium, clear hard glass pane, resistant against temperature changes • 85-264V AC, 12-375V DC, 24V DC • light power: ca. 240 lm/LED • diode: 19 high power LED modules • input voltage: 85-264V AC/120-370V DC • without ballast 24V DC • illuminated area in 10m: approx. Ø 1,2m • luminous flux: approx. 1.000 lm • luminosity: approx. 8,5 x 104 cd • range 35 lux in 100m • light intensity in 10m: approx. 800 lx • round angle: 6,95° • with high power LED • improved level of efficiency compared to halogen technology • suitable for DC and AC voltage with ballast • compact and solid construction
